AURORA SMART MOTOR TECHNOLOGY

Bring digital intelligence to your pumping applications

Aurora Motors is making it easy to step into the digital age. Connect your remote industrial assets and equipment, enable data collection and analysis, and gain remote access control of your pumping application.

Discover how to take command of your operations with digital monitoring and data acquisition solutions from Aurora. We are building the next generation of smart motors designed to increase your efficiencies and provide you the insights you need to operate effectively.

We are your resource for simple-to-use, cost-effective, and scalable digital solutions for remote industrial assets and equipment. Our industry expertise creates optimized solutions for our customers in the fluid management field.

Smart motors from the leader in reliability

The time has come to expect more from the VHS motors that drive your business. Aurora Motors are UL-approved NEMA Premium Efficiency, designed and built to the highest standards. We engineer and manufacture a broad line of inverter-duty vertical pump motors, available in WP1 or TEFC enclosures with hollow or solid shafts. Aurora delivers the performance you expect with the reliability you need.
